JOIN OUR TEAM

WE HIRE AN IT SYSTEM ENGINEER WITH FOCUS ON MICROSOFT TECHNOLOGIES

As an IT System Engineer, you will be instrumental in designing, implementing, and maintaining our IT infrastructure with a focus on Microsoft Server and Microsoft Cloud technologies.

You will work closely with our IT team to ensure system reliability, security, and efficiency. Your role will involve troubleshooting complex issues, managing system upgrades, and integrating new technologies to enhance our business operations.

QUALIFICATIONS

- Higher degree in IT or Computer Science (or past experience)
- At least 5 years of relevant work experience in a similar function
- Strong problem-solving skills and ability to manage complex system environments.
- Excellent communication skills in English; proficiency in German and/or French is a significant advantage.

RESPONSIBILITIES

- Supervising all the company's information systems
- Carrying out preventive maintenance operations
- Identifying and resolving system infrastructure problems
- Analysing the infrastructure and proposing relevant points for improvement
- Participating in audits, drafting procedures, and documentation.
- Managing the servers, virtual machines, physical environment, data storage, and Backups.
- Implementing, maintaining, updating, and monitoring the IT infrastructure on a daily basis.

YOUR PROSPECTS

- High job stability and the opportunity for further development
- Independent work with short decision-making paths
- A multicultural working environment that promotes diverstity and inclusion
- A competitive salary and other company benefits
- You can become part of a solid and dynamic company
